

# FIBREFORM

*Superior Performance with  
Minimal Environmental Impact*

**Pulp  
Molding**

*P r o t e c t i v e   P a c k a g i n g   P r o d u c t s*

## FULL SERVICE PULP MOLDING

*Fibreform produces high quality molded pulp protective packaging products. Our full service capabilities make us your one-stop pulp molding resource.*

*State-of-the-art manufacturing and innovative tooling allow us to be leaders in quality and product scope.*

*We provide custom items from plain to intricate, small to large, short runs to high volume. Our commitment to customer satisfaction means you'll enjoy the quickest response times in our industry.*

### **Design & Engineering Assistance**

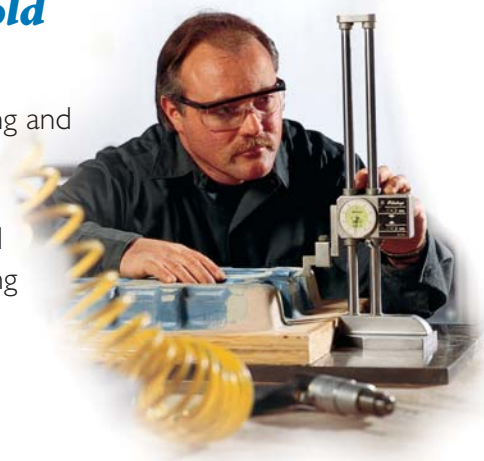

Our design and engineering department is known for creating solutions that give you the optimum performance. Involve us at any stage of development and we'll work closely with you to make sure you realize the highest level of quality, performance and cost-effectiveness; producing superior packaging protection *and* maximum efficiency on the manufacturing line.

## ***In-House Mold Production***

In-house prototyping and mold production means faster, more reliable turn around and uncompromising quality control.

## ***Our Research & Development Gives You the Advantage***

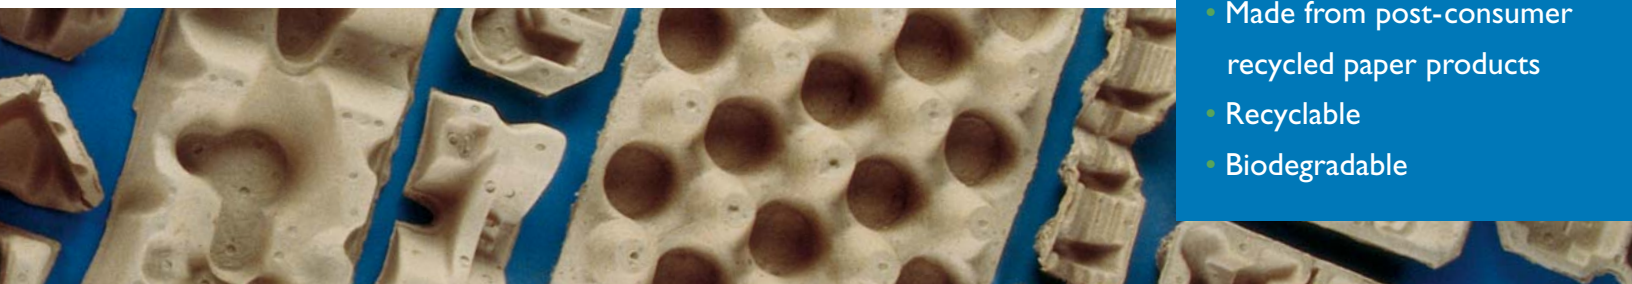

Innovative materials and mold production techniques give you the widest possible range of design options. Some of our current products include protective packaging for plumbing fixtures, audio speakers, windows, electronics and auto parts as well as roll cradles for the plastic film industry.

## ***An Obsession with Customer Satisfaction***

We pride ourselves on building and maintaining excellent customer relationships. That means doing whatever it takes to make you look good. From engineering and mold making to manufacturing and shipping we continuously search for ways to provide better products and better response to your needs; making your job easier and your products more appealing to your customer. Three shifts run at two facilities offering quick turn around and efficient, on-time delivery. With Fibreform, you'll have the products and the service you need, when you need it.

### ***Features of Fibreform Products***

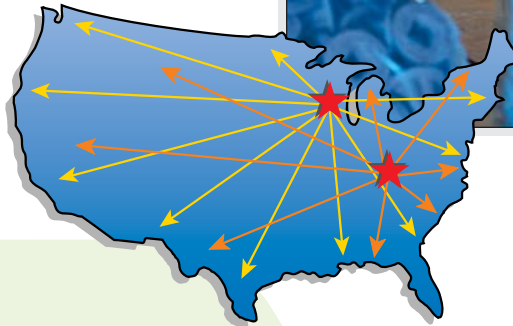

- Strong
- Lightweight
- Non-brittle
- Non-toxic
- Virtually static free
- Nestable
- Easy & safe handling
- Stays in place during shipping
- Made from post-consumer recycled paper products
- Recyclable
- Biodegradable

## ***Shipped the Way You Need it Shipped***

Facilities in Wisconsin and Kentucky ensure convenient, reliable, on-time delivery. Our shipping department has the flexibility to pack and ship your order virtually any way you request it. And, for even more efficiency, we can provide warehousing and Just-In-Time delivery.

## ***Fibreform... the Environmentally Sound Choice***

Fibreform products are produced from post-consumer recycled paper and are easily recycled or incinerated. That means a good image for your product with less cost and fewer hassles dealing with health, handling and disposal issues.
